

Dino-Lite AD7013MZT

The Dino-Lite AD7013MZT has a 5 megapixel sensor for crystal clear images, even under higher magnification. Because of the very high resolution, the AD7013MZT is the ideal solution for displaying microscopic images on large screens or using the microscopic images for printing. The AD series are equipped with exchangeable caps for even more flexibility. The built-in polarizer reduces the shiny effect on reflecting materials, such as metals, plastics, jewelry, electronics etc.
